

RAYNER BESTARD DÍAZ

UNREAL ENGINE GAMEPLAY DEVELOPER | TECHNICAL DESIGNER

rayner.best@gmail.com | +53 53149015 | linkedin.com/in/rayner-bestard-díaz | Remote

PROFESSIONAL SUMMARY

Unreal Engine Gameplay Developer and Technical Designer with 5+ years of production experience across international indie and distributed teams. Builds character movement, combat, traversal, abilities, AI, animation, multiplayer, UI and interaction systems, primarily with Blueprints and complemented by practical C++ development and debugging. Experienced taking features from design and prototyping through implementation, integration, optimization and iteration in Unreal Engine 4 and 5. Contributor to Kristala, FusyFox: Mission to Mars, Gold Fever: The Promised Land and the award-winning Dark Life: Excalibur.

CORE SKILLS

Unreal Engine 4/5 • Blueprints • C++ • Gameplay Programming • Technical Game Design • Character Movement & Traversal • Combat & Ability Systems • Animation Blueprints • Motion Warping • AI & Behavior Trees • Multiplayer Replication • Gameplay Ability System (GAS) • UMG • Inventory & Interaction • Editor Tools • Performance Profiling • Git

PROFESSIONAL EXPERIENCE

ASTRAL CLOCKTOWER STUDIOS — Gameplay Programmer | Technical Designer

Remote Contract | Sep 2023 – Aug 2025 | Kristala — Unreal Engine 5 action RPG

- Developed core character movement, combat and ability systems using Blueprints and C++.
- Designed and implemented traversal mechanics including vaulting, climbing, pole swinging, wall running and wall jumping.
- Integrated character animations through Animation Blueprints, notifies and gameplay logic, collaborating closely with animators.
- Implemented NPC and enemy behaviors with Behavior Trees and created designer-friendly tools for feature integration.

INSANE GAMES STUDIO — Co-Founder | Lead Game Developer

Mar 2023 – Present

- Lead creative and technical development of Unreal Engine prototypes, translating game concepts into playable systems.
- Build gameplay mechanics in Blueprints and C++, integrate assets and coordinate a small cross-functional team around project milestones.

FUSYONA — Gameplay Programmer | Technical Designer

Remote Contract | Oct 2022 – Mar 2025 | FusyFox: Mission to Mars — UE5 multiplayer shooter

- Built modular weapons, characters, class abilities and arena combat systems using Blueprints, C++ and GAS within a Lyra-based architecture.
- Implemented multiplayer replication, networking, matchmaking-related gameplay and UMG menus/HUD.
- Collaborated with designers and artists to refine gameplay systems and integrate Web3-backed game assets.

PROFESSIONAL EXPERIENCE — CONTINUED

ZERO STUDIOS — Lead Gameplay Programmer | Technical Designer

Remote Contract | Jul 2020 – Nov 2024 | Dark Life: Excalibur — Unreal Engine action RPG

- Designed and implemented combat, traversal, progression, inventory and quest systems using Blueprints and C++.
- Created enemy and boss AI with Behavior Trees and developed cinematic-to-gameplay transitions, UMG interfaces and Motion Warping-based movement.
- Authored the Game Design Document and led gameplay programming, code migration and optimization for PC and PlayStation-oriented development.

BITTER CHERRY PRODUCTIONS — Gameplay Programmer

Remote Contract | Nov 2020 – Aug 2023 | Gold Fever: The Promised Land — UE4/UE5 survival RPG

- Implemented combat, survival, progression, inventory, UI and character-environment interaction systems with Blueprints and C++.
- Developed animation logic, companion AI, enemy behaviors and a dynamic camera system responsive to character state and environment.
- Coordinated programming tasks and system integration across the development team.

EARLIER EXPERIENCE

UNIVERSITY OF HAVANA — Professor | Sep 2020 – Oct 2022

Taught front-end web application development and supported WordPress-based institutional platforms.

IRIS PRODUCTIONS, UNIVERSITY OF HAVANA — Software Developer | Sep 2013 – Oct 2022

Developed and maintained software supporting university academic processes; contributed to project management and team development methodology.

EDUCATION

UNIVERSITY OF INFORMATICS SCIENCES

Engineering degree in Computer Science / Software Engineering | 2007 – 2013

SELECTED RECOGNITION

PlayStation Talents Awards 2021 — Dark Life: Excalibur

Game of the Year • Best Game for the Press

LANGUAGES & TOOLS

Spanish — Native • English — Professional working proficiency

Rider • Visual Studio • Blender • Jira • Git
